## MINES AND MINING

# DUE TO DECLINE?

Coppers Place It in the

### Low-Cost Copper Felt.

The low-cost copper which the newer mines are beginning to put out, has already made itself felt in no uncertain way on the metal market. Utah Copper and Nevada Consolidated, for instance, are Nevada Consolidated, for instance, are at the present time outputting at the rate of 128,000,000 pounds per annum at a net average cost of under rather than over 8½ cents per pound. It is costing Amalgamated at least 10½ cents per pound to make its 190,000,000 pounds of annual product

The securities of Utah Copper and Nevada Consolidated combined are selling in the stock market for \$75,000,000; Amal-gamated is selling for \$130,000,000—a comparison heavily in favor of the two so-called Guggenheim properties, especially when the cost prices of each are placed

The entrance of the Guggenheims into the copper producing industry has not been viewed complacently by the Amal-gamated people, and they have retaliated by entering the smelting business, for-

samated people, and they have retaliated by entering the smelting business, formerly monopolized by the Guggenheims, and have organized the International Smelting & Refining company, "to fight the smelting trust."

The real split between these two big interests happened early in 1907, and arose over a dispute concerning the settlements which the American Smelting & Refining company was making for silver, the selling of which was handed over to them by the Amalgamated people in return for the selling of the Smelting company's copper output. Soon after there followed the loss of the Utah Copper company's copper-selling contract by the United Metals Selling company to the newly organized selling agency of the Guggenheims. The breach has been growing wider ever since.

Guggenheims Strong Factor.

The Guggenheims are today selling year-varieties the profits of the Montgomery Shoshom of the Montgomery Shoshom of the first six months of the year 1999 were \$126,500, represent of the gross receipts of the milling operations, says the Rhyolite Herald.

Since John G. Kirchen took charge, about \$225,000 of the indebtedness of the company has been wiped out, and about \$30,000 expended in improvements.

The present net production is 10 per cent on the par value and more than 20 per cent on the market value of the stock, the par value being \$5 a share and the net profits per year being 50 cents a share.

The output is limited only by the milling for the most per value and more than 20 per cent on the market value of the stock, the par value being \$5 a share and the net profits per year being 50 cents a share.

The output is limited only by the milling for the company and the town of National. The distance of time is a the depth, What this means can be assays the Rhining of the gross value of the gross value and more than 20 per cent of the provided in improvements.

The present net production is 10 per cent of the stock, the part can be done by tunneling and at company to the length of the stock, the part can be done by tunne

The Guggenheims are today selling yearly 250,000,000 pounds of copper, and are in position to put up a stiff argument in any trade controversy with the Amalgamated-United Metals Selling interests.

The time has gone by when the predictions of low costs by Nevada Consolidated and Utah Copper can be laughed down; the "goods" are being delivered. With these two properties there are in process of exploitation no less than a dozen mines which now claim to have ore in sight amounting to 250,000,000 tons, and if en mines which now claim to have ore in sight amounting to 250,000,000 tons, and if the copper recovery therefrom is only 35 pounds per ton, there results a prospective workings, was started last week and the work done on the levels above will be dupled to the copper recovery. yield of new copper, or copper from new fields, almost staggering in its immensity.

These are some of the conditions which face the old-time high cost mines which are taking out their ores from great depths, and are meeting with receding the 200, 200, 400 and 500 levels.

### HAMILTON DISTRICT HAS ORE PRODUCER

Ely, Nev., Aug. 29.-Hugh Coyle enjoys the distinction of being the only shipper from the Hamilton district during the summer. From practically virging ground on the north side of White Pine mountain Mr. Coyle has been sending a fine quality of ore to the smelters at Salt Lake. Three teams are at present engaged hauling the ore to Eureka, forty-two miles. The ore that is being placed on the dump carries good values in gold

long connects the two sharts. It is in this arift that Coyle is stoping his best orc."

Nothing is being done on any of the other properties. Ed McEllin is arranging to have the Young Treasure and adjoining claims patented. Until then the ground will be allowed to remain idle. The Young Treasure has been the largest shipper from Hamilton in past years.

silver and lead and will average \$50 a ton in the three metals.

"Mr. Coyle has been handicaped considerably in the past," said Fred Beck, who is over from Hamilton, "because he was compelled to handle the ore many more times than was really necessary. He has one shaft to depth of sixty feet, and a short distance away is another shaft twenty feet deep. A drift 100 feet long connects the two shafts. It is in this drift that Coyle is stoping his best ore."

tune is now within their grasp.

H. M. Ray, a practical miner, said:
"The camp looks very good, I didn't get
around as much as I wanted to, but drew my opinion partially from the good spirit prevailing. Everybody seemed satisfied and had no kick coming. If there is anything wrong with a camp you can always hear it from someone, but everybody at George's canyon is satisfied and enthuslastic over the showings.
"I think is will make a big milling camp.

It may not make as many rich shipments as some camps have, but the milling values are there in abundance. On Shepvalues are there in abundance. On Sheppard's ground a stringer was struck on the surface which has since widened to over a foot with gouge and all and it all Mill That Ground Wealth for Fair Is

### MINE PRODUCES CLOSE TO MILLION AN ACRE

Victor, Colo., Aug. 29.—Although pump-in ghas ceased on lower level of the Strong mine in this city, the output of the mine is held at from seven to ten cars a week, and from a reliable source it is learned that the reserves above water level cannot be exhausted within two years. New ore bodies are frequently entered and the ore shipped is believed of equal value to the highest average of any shipping mine of present date.

The Strong mine contains less than ten acres, but it has produced—gross bullion value—not far short of \$1,000,000 to each acre of the original seven and one-half acres contained in the claim as patented.

Notice of Application for Desert Land

Selection. Notice is hereby given that E. Warren Stees of Salt Lake City, Utah, has made application to reclaim certain desert lands pursuant to the act of congress approved August 18, 1894, and acts amendatory thereof, known as the Carey Land Act; and pursuant to Chapter 2 of the Revised Statutes and Chapter 31 of the laws of 1909 of the State of Utah and all supplemental laws, and rules and regulations rules and regulations of the State Board of Land Commissioners of the State of Utah, and proposes to construct reservoirs, dams, in accordance with plans submitted to said Board, to store and carry water for the purpose of reclaiming said lands, and to sel' and dispose of water rights, under the system of irrigation works thus proposed to be constructed by the said company, the said lands for which application has thus been made being situated in Emery Copnty, State of Utah, and more particularly described as follows, to wit:
